

The SP-5V-60MA-68X37MM is a small polycrystalline solar panel able to generate up to 5v at 60mA.

This product is a 5v 60mA (0.3W) solar panel with high efficient polycrystalline cells mounted onto the fibreglass PCB and covered with epoxy resin, which protects the cells without reducing efficiency. The panel is fairly strong, lightweight, incredibly durable and reliable. You can use this solar panel to power your projects with free renewable energy from the sun. How awesome is that!

Features

- Polycrystalline Solar Cell with epoxy resin
- Maximum Power at STC (Pmax): 0.3W
- Optimum Operating Voltage (Vmp): 5V
- Optimum Operating Current (Imp): 60mA
- Product Size: 68mm x 37mm x 3mm
- Pre-soldered with wires and can be used out of box
- Cable length: ~10cm

Shipping List

- 1 x Solar Cell/Panel 5V 60mA (0.3W) with Wires
